2.04 Committee

This committee reports directly to the board and is responsible for addressing the issue of properties deemed derelict in the park. Its responsibilities include recommendation and completion of corrective action as approved by the board.

This committee reviews properties in the park that are not up to park standards and after board approval, will have the properties cleaned and charge the owner if the owner does not respond to the request to properly maintain their property

Architectural and Compliance

The priority of this committee is to help you make improvements to your property and to help with the permits required by Riverside County.

Emergency Preparedness (EPC)

“It is the mission of the Desert Crest Emergency Preparedness Committee to minimize the loss of life and damage to our property during acts of destruction, by creating awareness of potential dangers, encouraging the remedy or mitigation of these threats to our person and property, by obtaining and maintaining emergency gear and supplies to be self-sufficient for a fourteen-day period, and by providing necessary training opportunities to all residents to improve their skills and enhance everyone’s chance for survival in case of a disaster.”

Recycling Committee

A committee consisting of Robin Johnson and his helpers will be working each Monday beginning at 8:00 am checking for recyclable items. The money received for selling these items will be used for the park. Purchases include a portable sound system and professional gym equipment. Homeowners are encouraged to write down suggestions for future purchases. Homeowners are reminded not to put these recyclable items in their blue box, preferably in a plastic bag away from the trash.

Owner and Renter Forms - Owner and Renter forms are given out at the interview.
